

# FIXED & ADJUSTABLE HEIGHT PEDESTALS

Weatherproof &  
Durable

Easy Install  
& Removal

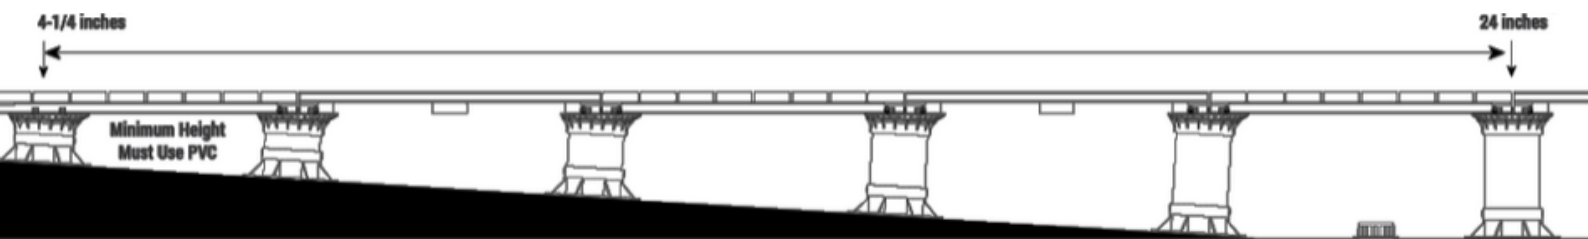

Protects  
Surface Below

## DECK SUPPORT WITH RAISED PEDESTALS

---

Pedestals range in height from  $\frac{1}{8}$  inch to 42 inches so regardless of the surface, slope level and height, we have a product for sloped membrane roofs or level condo balconies.

## DESIGNED FOR OUTDOOR FLOORING PAVERS

---

Pedestals are designed to protect your rooftop membrane.

You easily access the floor or surface below yourself without needing to tear or unscrew your flooring and in a matter of minutes

## ADJUSTABLE HEIGHT PEDESTALS

Adjustable Pedestals are best combined with our Ipe or Porcelain paver systems. The combination of the pedestals are adjusted to account for the variation in the height and slope of the surface below while maintaining a level surface above. Speak to our team about your project to decide which pedestals will be the best fit for your project.

## FIXED HEIGHT PEDESTALS

Fixed height pedestals are perfect for situations where the low point in the surface below and the desired high of the new deck surface will not surpass 4 inches. Fixed height pedestals can be combined with rigid styrofoam, shingles, and shims to achieve the desired height and level. Skyscapes stores ample stock of most of the fixed height pedestals locally in the Greater Toronto Area, this means quick turnaround time on your projects!
